# 2008 Annual Report on China's Coal Chemical Industry

## 一、调研说明

《2008 Annual Report on China ' s Coal Chemical Industry》是艾凯咨询集团经过数月的周密调研，结合国家统计局，行业协会，工商，税务海关等相关数据，由行业内知名专家撰写而成。报告意于成为从事本行业人士经营及投资提供参考的重要依据。

报告主要可分为四大部分，首先，报告对本行业的特征及国内外市场环境进行描述；其次，是本行业的上下游产业链，市场供需状况及竞争格局从宏观到细致的详尽剖析，接着报告中列出数家该行业的重点企业，分析相关经营数据；最后，对该行业未来的发展前景，投资风险给出指导建议。相信该份报告对您把握市场脉搏，知悉竞争对手，进行战略投资具有重要帮助。

## 二、摘要、目录、图表

Chapter One Current situation of the development of coal chemical industry	1
Section One Profile of coal chemical industry	1
First, products chain of coal chemical	1
Second, analysis of coal chemical industry	3
Section Two Survey of development state of scientific and technological of coal chemical industry	7
First, current situation of the development of scientific and technological of coal chemical industry	8
Second, technological research and industrialization of clean coal	17
Third, the state of technology development of coal to methanol	35
Fourth, the state of technology development of coal-to-oil	37
Section Three Current situation of the development of China coal chemical industry of 2007	47
First, current investment situation of coal chemical industry of our country	47
Second, technology development of coal chemical industry lags behind	52
Third, four kinds of coal chemical industry was demand to stop which initiate foreign capitals to be anxious	53
Fourth, hide the crisis under coal chemical industry's high profit	55
Fifth, current situation analysis of coal chemical industry of our country	61
Section Four Development trend of coal chemical industry of our country	76
First, high oil price impel coal chemical industry to step into and develop the new stage	76
Second, development of coal chemical industry will move ahead in the carefulness	83
Chapter Two Development environment analysis of China coal chemical industry	93
Section One Resource environment	93
First, distribution of Chinese coal resource	93
Second, sustainable development analysis of coal resource	95
Third, state and influence of water resource	101
Fourth, the high oil price promote the fast development of coal chemical industry	103
Section Two Policy environment	107
First, the examination and approval project attitude of national development and reform committee is prudent	108

Second, six ministries and commissions support the development of new coal chemical industry	111
Third, domestic coal chemical industry plan wait to issue	113
Fourth, coal chemical industry's policy is expected to issue at the end of 2007	115
Section Three Economy environment	117
First, Chinese economy will keep fast steady growth	117
Second, development prospect analysis of coal chemical industry	120
Third, traditional coal chemical industry of our country is being transformed into chemical industry of new energy	122
Fourth, current situation of international coal chemical industry	127
Section Four Technology environment	128
First, coal chemical industry establishes the innovation strategy alliance	128
Second, two major factor analysis that restrict industrialization of coal chemical industry	134
Third, independent coal gasification new technology encounter four major bottlenecks	137
Chapter Three Relevant trade development analysis of coal chemical industry	142
Section One Development analysis of coal industry	142
First, running situation of the first half of 2007 and predicting of coal industry	142
Second, economical operation analysis of coal in January - May of 2007	150
Third, the coal exploitation of our country will manifest three characteristics in the following 15 years	158
Fourth, The coal market operates steadily, the surplus risk of production capacity is strengthened	158
Fifth, the coal price will operate at the high position in 2007	162
Sixth, two major policy goals that Chinese coal industry develops	166
Section Two Coal chemical industry equipment industry's development analysis	168
First, the large-scale device of production domesticization can lower costs effectively	168
Second, tap equipment manufacturer of coal chemical industry shares hundred billion markets	169
Third, domestic biggest heaviest coal chemical apparatus was born in Yunnan	173
Fourth, the Eleventh Five-year Plan development plans of coal chemical industry apparatus	175
Chapter Four Development analysis of coal chemical industry of every area	178
Section One Current situation of development of Shanxi coal chemical industry	178
First, route choice and analysis of Shanxi coal chemical industry	178

Second, " coal chemical industry " has already become the new industry's pillar of emerging in Jincheng of Shanxi	186
Section Two Current situation of the development of Henan Province coal chemical industry	187
First, Henan coal chemical industry contest	188
Second, three major groups of Henan Province set about setting up the chemical group of coal industry	192
Section Three Current situation of the development of Xinjiang coal chemical industry	193
First, the coal giant beaches in Xinjiang coal chemical industry and enters gather period	193
Second, Xinjiang will build up the super-huge coal electric coal chemical industry base of our country	196
Section Four Current situation of the development of Anhui Province coal chemical industry	197
First, Anhui use 220 billion to build four major coal chemical industry bases	197
Second, the project which China and United States cooperative coal chemical industry contract in Suzhou of Anhui	198
Section Five Current situation of the development of Kweichow Province coal chemical industry	199
First, Guizhou puts forth effort to make the industrial zone of western coal chemical industry	199
Second, Guizhou large-scale coal chemical industry project puts into operation	200
Section Six Current situation of the development of the Inner Mongol coal chemical industry	201
First, coal chemical industry becomes the new light spot of key project construction of industry of the Inner Mongol	201
Second, the biggest energy company of our country established in Mengdong	202
Third, Zetian group invests in the Inner Mongol coal chemical industry	204
Section Seven Current situation of the development of other area coal chemical industry	205
First, Asia largest coal chemical industry base Ningdong energy chemical base will emerge	206
Second, Ningxia plans to invest 300 billion yuan to build coal chemical industry base	209
Third, Sichuan Yibin Tianyuan group invest 8 billion build Zhaotong coal chemical industry base	210
Fourth, Midwest make the investment near 3 billion yuan to build coal chemical industry project	211
Fifth, Hebei Xingtai invest 16 billion to build national first coal chemical industry base	212
Chapter Five Development prospect analysis of traditional coal chemical industry chain	214
Section One Current situation of the development of traditional coal chemical industry	214
Section Two coking of the coal	219

First, coking trade's running situation and characteristic of our country of 2006	219
Second, export situation analysis of coke of our country	227
Third, carry out the national coke industrial policy and promote the structural adjustment	230
Fourth, analysis and predicting of coking products market of the first half of 2007	237
Section Three Calcium carbide ethyne chemical industry	245
First, current situation of the development and prospect of calcium carbide trade	245
Second, Shanxi calcium carbide trade	249
Third, BDO market demand analysis	253
Fourth, current situation analysis of market of PVA industry	254
Fifth, see the development of coal chemical industry from PVC trade	256
Section Four Industry chain of synthetic ammonia	260
First, condition of production of industry chain products of Chinese synthetic ammonia	260
Second, the price tendency and future influence factor of urea of our country	264
Third, our country utilizes coal gasification of coke oven to produce the chemical fertilizer on a large scale and become reality	273
Chapter Six Development prospect analysis of industry chain of coal-to-oil	275
Section One Economy analysis of coal-to-oil	275
Section Two Current situation of the development of Chinese coal-to-oil industry	277
First, development situation analysis of coal-to-oil industry	278
Second, the development state of domestic and international coal-to-oil	282
Third, " coal-to-oil " make the mythology of world	291
Fourth, invest of Chinese coal-to-oil is hot or enters ice-bound one temporarily	294
Section Three Analysis and prediction of Chinese readymade oil market	301
First, pluralistic pattern of market of domestic readymade oil further take shape	301
Second, the oil price goes up, the readymade oil criticize zero to hang upside down	302
Third, the imports and exports situation of Chinese oil dividing variety in June of 2007	305
Fourth, development analysis of foreign capital corporation in Chinese readymade oil market	306
Fifth, rise of the oil price test pricing mechanism of Chinese readymade oil	311
Chapter Seven Development prospect analysis of coal to alcohol ether fuel industry chain	315
Section One Development prospect analysis of methanol fuel	315

First, the fuel of methanol is developed imperatively	315
Second, state of development of petrol of foreign methanol	320
Section Two Development state of methanol trade	323
First, analysis of domestic and international methanol market	323
Second, current situation of the development and predicting in the future of methanol of our country	338
Third, the present methanol trade of our country faces five major risks	346
Section Three application development prospect analysis of methanol traditional downstream	349
First, current situation and development of formaldehyde industry of our country	349
Second, the construction climax with a new round of acetic acid of world	362
Third, international acetic acid market rise in an all-round way in May of 2007	363
Fourth, output of domestic acetic acid will continue expanding	366
Fifth, Asia cranes one's neck to look into the distance on global MMA market	369
Section Four Development prospect analysis of coal to alcohol ether fuel	374
First, development of DME obtains the national policy support gradually	374
Second, DME become the important substitute fuel of our country	376
Third, the industry chain of coal-based alcohol ether will be develop first	379
Fourth, economy of coal-based alcohol ether route	381
Fifth, refine methanol with the coal it is coal chemical industry ripest technology	382
Sixth, supply pattern of Chinese methanol change because of coal chemical industry	388
Seventh, scale popularize of coal-based alcohol ether fuel still owe " the east wind "	391
Chapter Eight Development prospect analysis of industry chain of coal-to-alkene	403
Section One Development summary of coal-to-alkene	403
First, technology development and economic analysis of coal-to-alkene	403
Second, brief introduction of China MTO technical development	413
Third, coal-to-alken industry chain has important value	415
Fourth, economy analysis of coal-to-alken	416
Fifth, coal-to-alkene technology waits to examine	417
Sixth, see coal chemical industry developemt from the polyvinyl chloride industry	419
Section Two Analysis and prediction of Chinese ethylene market	422
First, scale of Chinese ethylene device are being integrated with the world level at a fast pace	422

Second, consumption of Chinese polyethylene increase rapidly 425  
Third, analysis of current situation of the development of Chinese ethylene market 429  
Section Three Analysis and prediction of Chinese propylene market 435  
First, supply and demand analysis of global propylene 435  
Second, Chinese polypropylene will rely on import in a large amount shortly 439  
Third, polypropylene continues increasing in the car market demand 443  
Fourth, Lanzhou petrochemical industry polypropylene device with domestic deactivator technology is ripe already 443

Chapter Nine Coal chemical industry listed company's introduction 446

Section One Shanxi Sanwei group limited company 446

First, company's overview 446

Second, industry chain analysis of company ' s coal chemical 448

Third, business performance analysis of 2007 454

Fourth, financial analysis of 2007 456

Section Two National Coal group company 459

First, company's overview 459

Second, company's operation 461

Third, expenses of coal chemical industry of 2007 462

Fourth, investment project of coal chemical industry 463

Section Three Liuzhou chemical industry limited company 465

First, company's overview 465

Second, deeply develop products chain of coal chemical industry 468

Third, methanol project of coal chemical industry 472

Fourth, financial analysis of 2006-2007 472

Section Four Shanxi Lanhua Sci-Tech Venture Co. Ltd 477

First, company's overview 477

Second, business development of coal chemical industry 479

Third, development strategy 480

Fourth, financial analysis of 2006-2007 481

Section Five Kailuan cleaned coal limited company 486

First, company's overview 486

Second, business development of coal chemical industry	486
Third, financial analysis of 2006-2007	499
Section Six Yunnan Yuntianhua limited company	504
First, company's overview	504
Second, holding Inner Mongol coal chemical industry enterprise	505
Third, financial analysis of 2007	509
Section Seven Shandong Hualu-Hengsheng chemical limited company	513
First, company's overview	513
Second, development situation of coal chemical industry	516
Third, financial analysis of 2006-2007	517
Section Eight Shanxi coking limited company	521
First, company's overview	521
Second, development analysis of management	524
Third, financial analysis of 2006-2007	537
Chapter Ten Introduction of non- listing enterprise of coal chemical industry	542
Section One Shenhua group	542
First, company's overview	542
Second, coal-to-oil production line will be built up	543
Third, catalyst purchase of 1,800,000 tons of methanol to alkene project of Shenhua Baotou contract	547
Fourth, Shenhua Baotou coal chemical industry PP factory selects Univation craft device for use	548
Fifth, development goal of coal chemical industry of company	549
Sixth, Shenhua tries hard to recommend internationalized development	550
Section Two Shandong Yankuang Corporation (Group)	551
First, company's overview	551
Second, current situation of the development of coal chemical industry	552
Third, successful experience of Yankuang coal chemical industry	560
Fourth, six major measures severely take charge of research and development and transform of key technology of coal chemical industry	562
Fifth, “ the eleventh five-year plan “ Yankuang development plan	563
Section Three Shanxi Datong coal mine group limited company	565

First, company's overview 565

Second, 1,200,000 tons per year of methanol project engineering of group go into operation 566

Third, Datong coal mine group's sustainable development strategy analysis 567

Section Four Tianji coal chemical industry Corporation (Group) 575

First, company's overview 575

Second, establish the joint-stock company 577

Third, the development retrospect of group in 2006 578

Section Five Pingdingshan coal group 580

First, company's overview 580

Second, Pingdingshan coal group is united by marriage with Lantian group 583

Third, chain analysis of coal chemical industry of group 584

Section Six Xuyang coking group 585

First, company's overview 585

Second, the new project is started 587

Third, company's development goal 588

Section Seven Panzhihua iron & steel group coal chemical industry company 589

First, company's overview 589

Second, development state of recycle economy of Panzhihua iron & steel coal chemical industry factory 591

Section Eight Anhui Huaihua Corporation (Group) 599

First, company's overview 599

Second, development retrospect of the company coal chemical industry during the State's Tenth Five-Year Plan period 600

Section Nine Yunnancoal chemical industry Corporation (Group) 605

First, company's overview 605

Second, company's development goal 607

Section Ten Investment situation of other enterprises 610

First, Chitianhua investment coal chemical industry 610

Second, Guanghui joint-stock company plans to invest in 2 billion and build coal chemical industry 613

Third, Tiancheng Taiyuan University of Technology Co.,Ltd will continue plotting coal chemical industry 615

Fourth, Shanghaijin coal chemical industry invests to build first project of our country of coal chemistry

to ethylene glycol 616

Fifth, Zhongyuan Dahua signs project agreement with Hemei group to build coal chemical industry jointly 617

Sixth, Shanxi Taiyuan Chemical forms coking synthetic ammonia and PVC integrated industrial pattern 619

Seventh, Yunwei joint-stock company marches into new coal chemical industry 621

Eighth, THUMB group invests 3 billion yuan to develop Xinjiang coal electric coal chemical industry project 622

Chapter Eleven Development trend and countermeasure of coal chemical industry of our country 623

Section One Development trend analysis of coal chemical industry 623

First, coal chemical industry takes demonstration project as the core during 'Eleventh Five-Year Plan' period 623

Second, the development direction of coal chemical industry of our country is fine and poly-generation 624

Third, it is a major mode of the future that the energy integrates with chemical industry 626

Section Two Investment prospect analysis of coal chemical industry 628

First, investment prospect of coal chemical industry 628

Second, "two tax-in one" or have influence to coal chemical industry 630

Section Three Tactics that our country develops coal chemical industry 631

First, development direction analysis of sub industry of coal chemical industry 631

Second, coal chemical industry develops in a healthy way and must find one's own main directions accurately 637

Third, the question discussion of choose site about large-scale coal chemical industry project factory 640

Fourth, take our country as the core and develop modern coal chemical industry 648

## CHART CONTENTS

Chart: Industry chain sketch map of coal chemical 2

Chart: Products chain sketch map of coal chemical 3

Chart: Structural proportion of the total amount of Chinese fossil energy sources 49

Chart: Every province (autonomous region, municipality directly under the Central Government)

precipitation scale of plain district of the North of 2006 102

Chart: Contrast of unit GDP crude oil and elementary energy consumption of China and main developed country 104

Chart: Rate of calorific and price of China three major energy and compare with U.S.A. price 104

Chart: Tendency of volume of production and marketing of crude oil of our country of 1965-2005 105

Chart: The rate of store to exploitation of crude oil (volume express the size) 105

Chart: The resource reserves form of main area of the world 106

Chart: Coal consumption structure of our country 106

Chart: Technology development progress of coal chemical industry of our country 107

Chart: Main route of development of coal-based liquid fuel 121

Chart: The utilization ratio situation of production capacity of coal, coke, calcium carbide, urea of our country in 2005 123

Chart: Breakthrough technology and device in new coal chemical industry field in recent years in our country 125

Chart: Industry planning and goal that some provinces in our country develop coal chemical 127

Chart: Technical indicators contrast of different coal gasification 137

Chart: The income and profit situation of coal industry in January of 2006 - May of 2007 151

Chart: Accumulative total of sales revenue of goods and growth trend of coal industry in 2005- May of 2007 152

Chart: The lose situation of loss-generating enterprise of coal industry in January of 2006 - May of 2007 153

Chart: Situation of total industrial output value of coal industry in January of 2006 - May of 2007 154

Chart: Accumulative total of gross industrial output value and growth trend of coal industry in 2005- May of 2007 154

Chart: The situation of production and marketing and store of coal of state colliery in Jan-May of 2007 155

Chart: Large-scale production effect of the methanol device 169

Chart: Equipment investment proportion form of modern coal chemical industry 172

Chart: Core equipment of modern coal chemical industry and corresponding advantage manufacturing enterprise 173

Chart: Important manufacturer of coal chemical apparatus field 173

Chart: Output tendency of domestic coke of 2001-2005 215

Chart: Output tendency of domestic coal tar of 2000-2005 216

Chart: The application structure of coal tar 216

Chart: Output tendency of the domestic calcium carbide of 1999-2005 217

Chart: The production cost forms of calcium carbide 217

Chart: Proportion of production technology of domestic polyvinyl chloride 218

Chart: Production cost of different production methods of polyvinyl chloride 219

Chart: Export quantum and increase rate of Chinese coke of 1999-2006 228

Chart: Price and index of coke, coal tar and thick benzene in April - June of 2007 238

Chart: Output change of the calcium carbide of 1996-2006 245

Chart: Calcium carbide ' s output of our country in May of 2007 246

Chart: Output of synthetic ammonia of our country in May of 2007 260

Chart: Output of urea of our country in May of 2007 261

Chart: Output of concentrated nitric acid of May of 2007 262

Chart: Price tendency of ammonium nitric acid of 2006- June of 2007 263

Chart: The scale of investment and economic evaluation of coal liquefaction 275

Chart: The economy analysis of coal-to-oil (indirect method) 276

Chart: The province of our country which coal reserves are over of 10 billion tons 277

Chart: Proportion that coal and water reserves in the main coal province take the whole country 277

Chart: Market price of readymade oil of 2006- May of 2007 304

Chart: Imports and exports data overview of Chinese readymade oil in June and January - June of 2007  
306

Chart: Application structure of methanol of U.S.A. of China 322

Chart: Global methanol project which main under construction and planning to build in 2007-2010 325

Chart: The consumption form of methanol in the global main area in 2001-2005 327

Chart: Main statistics of the output of manufacturing enterprise of methanol of our country of 2003-2006  
329

Chart: Methanol project which our country announces of 2006 331

Chart: Supply and demand situation of domestic methanol of 2000-2006 332

Chart: Imports and exports situation of domestic methanol of 2000-2006 334

Chart: The production and imports and exports situation of domestic methanol in 2006 335

Chart: Price of domestic methanol in August of 2005 - August of 2006 336

Chart: Price of methanol of Asian staple market in January - August of 2006 337

Chart: Statistic of newly-built production capacity of domestic methanol in 2007 348

Chart: Production capacity situation of formaldehyde of the whole country every area of 2005 351

Chart: The prediction of production capacity of formaldehyde in 'Eleventh Five-Year Plan' period 359

Chart: Price tendency picture of international acetic acid in April- May of 2007 364

Chart: Price tendency picture of domestic acetic acid in April- May of 2007 365

Chart: Asia newly-built PMMA project situation in 2005-2008 370

Chart: Global MMA newly building project situation of 2005-2008 372

Chart: The production demand situation of single MMA of three continents in 2005-2008 374

Chart: Output tendency of domestic liquefied petroleum gas of 2001-2005 375

Chart: DME event statistic of domestic listed company 375

Chart: Domestic DME project statistic of 2006 376

Chart: production capacity and output gap of methanol in 1995-2005 380

Chart: Corresponding relation of coal price - methanol production cost 382

Chart: Cost comparison of coal-to-methanol and natural gas make methanol 382

Chart: Comparison of methanol production technology of Davy method, Lurgi method and Tops e method 405

Chart: Current situation and prediction of alkene gap of our country of 2003-2010 416

Chart: Equilibrium of supply and demand and prediction of domestic ethylene of 2002-2015 416

Chart : Economy analysis of coal-to-alken 417

Chart: The contrast of catalyst between Dalian physics and chemistry institute and UOP company 418

Chart: The example of coal chemical industry poly-generation 419

Chart: The prime operating composing of Shanxi Sanwei group limited company in the first half of 2007 456

Chart: Profit distribution form of Shanxi Sanwei group limited company of the first half of 2007 457

Chart: Earning capacity form of Shanxi Sanwei group limited company of the first half of 2007 457

Chart: Operating capacity form of Shanxi Sanwei group limited company of the first half of 2007 458

Chart: Coverage capacity form of Shanxi Sanwei group limited company of the first half of 2007 458

Chart: Capital structure form of Shanxi Sanwei group limited company of the first half of 2007 458

Chart: Development capacity form of Shanxi Sanwei group limited company of the first half of 2007 459

Chart: Analysis of cash flow of Shanxi Sanwei group limited company of the first half of 2007 459

Chart: The plan of future products of Liuzhou Chemical limited company 471

Chart: The prime operating composing of Liuzhou chemical industry limited company in 2006 472

Chart: Profit distribution form of Liuzhou chemical industry limited company of 2006- the first quarter of 2007 473

Chart: Earning capacity form of Liuzhou chemical industry limited company of 2006- the first quarter of 2007 475

Chart: Operating capacity form of Liuzhou chemical industry limited company of 2006- the first quarter of 2007 475

Chart: Coverage capacity form of Liuzhou chemical industry limited company of 2006- the first quarter of 2007 475

Chart: Capital structure form of Liuzhou chemical industry limited company of 2006- the first quarter of 2007 476

Chart: Development capacity form of Liuzhou chemical industry limited company of 2006- the first quarter of 2007 476

Chart: Analysis of cash flow table of Liuzhou chemical industry limited company of 2006- the first quarter of 2007 476

Chart: The prime operating composing of Shanxi Lanhua Sci-Tech Venture Co. Ltd in 2006 481

Chart: Profit distribution form of Shanxi Lanhua Sci-Tech Venture Co. Ltd in 2006- the first quarter of 2007 482

Chart: Earning capacity form of Shanxi Lanhua Sci-Tech Venture Co. Ltd in 2006- the first quarter of 2007 484

Chart: Operating capacity form of Shanxi Lanhua Sci-Tech Venture Co. Ltd in 2006- the first quarter of 2007 484

Chart: Coverage capacity form of Shanxi Lanhua Sci-Tech Venture Co. Ltd in 2006- the first quarter of 2007 484

Chart: Capital structure form of Shanxi Lanhua Sci-Tech Venture Co. Ltd in 2006- the first quarter of 2007 485

Chart: Development capacity form of Shanxi Lanhua Sci-Tech Venture Co. Ltd in 2006- the first quarter of 2007 485

Chart: Analysis of cash flow of Shanxi Lanhua Sci-Tech Venture Co. Ltd in 2006- the first quarter of 2007 485

Chart: Basic situation of completed and under construction project of main coal chemical industry of Kailuan company 498

Chart: The prime operating composing of Kailuan cleaned coal limited company in 2006 499

Chart: Profit distribution form of Kailuan cleaned coal limited company in 2006- the first quarter of 2007  
500

Chart: Earning capacity form of Kailuan cleaned coal limited company in 2006- the first quarter of 2007  
502

Chart: Operating capacity form of Kailuan cleaned coal limited company in 2006- the first quarter of  
2007 502

Chart: Coverage capacity form of Kailuan cleaned coal limited company in 2006- the first quarter of 2007  
502

Chart: Capital structure form of Kailuan cleaned coal limited company in 2006- the first quarter of 2007  
503

Chart: Development capacity form of Kailuan cleaned coal limited company in 2006- the first quarter of  
2007 503

Chart: Analysis of cash flow form of Kailuan cleaned coal limited company in 2006- the first quarter of  
2007 503

Chart: The prime operating composing of Yunnan Yuntianhua limited company in the first half of 2007  
509

Chart: Profit distribution form of Yunnan Yuntianhua limited company in the first half of 2007 510

Chart: Earning capacity form of Yunnan Yuntianhua limited company in the first half of 2007 511

Chart: Operating capacity form of Yunnan Yuntianhua limited company in the first half of 2007 512

Chart: Coverage capacity form of Yunnan Yuntianhua limited company in the first half of 2007 512

Chart: Capital structure form of Yunnan Yuntianhua limited company in the first half of 2007 512

Chart: Development capacity form of Yunnan Yuntianhua limited company in the first half of 2007 513

Chart: Analysis of cash flow form of Yunnan Yuntianhua limited company in the first half of 2007 513

Chart: The prime operating composing of Shandong Hualu-Hengsheng Corporation (Group) in 2006  
517

Chart: Profit distribution form of Shandong Hualu-Hengsheng Corporation (Group) in 2006- the first  
quarter of 2007 517

Chart: Earning capacity form of Shandong Hualu-Hengsheng Corporation (Group) in 2006- the first  
quarter of 2007 519
